
Technical Data Sheet

Page 1 of 1

Properties:	AKEMI® Stone Cleaner is an acid-free, highly concentrated cleaning agent made of non-ionic surfactants, auxiliary agents, odoriferous substances and solvents. The product is free from phosphates and bases; the surfactants contained are in accordance with the presently valid laws governing surface-active substances and are biodegradable.								
Application Area:	AKEMI® Stone Cleaner is suited for a rapid and thorough removal of building material, wax and self-brilliant layers, thin concrete layers, oil and fat, soot, rubber and tar spots as well as residuals of synthetic colours and synthetic plastering on all natural and artificial stones, e.g. marble, travertine, slate, granite, bricks and cotto slabs, tiles, fair-faced concrete, cement tiles and similar materials.								
Instructions for Use:	<ol style="list-style-type: none">1. Dilute with water in the ratio of 1:1 to 1:500 and apply to stone surface.2. Allow the cleaner to work for 10-20 minutes.3. For deep staining scrub with a brush or nylon pad.4. Rinse thoroughly with water.								
Special Notes:	<ul style="list-style-type: none">- Do not apply on synthetic materials which are not resistant to solvents or rubber. If in doubt, test on an inconspicuous area.- For adequate waste disposal container must be completely emptied.

Coverage:	approx. 10 – 20 m ² /liter (undiluted)								
Colour:	colourless-yellowish								
Density:	approx. 1.01 g/cm ³								
pH value:	approx. 10 (if concentrated)								
Storage:	2 years if stored in cool place free from frost in its tightly closed original container.								
Health & Safety:	Read Material Safety Data Sheet before handling or using this product.								
Important Notice:	The above information is based on the latest stage of development and application technology. Due to a multiplicity of different influencing factors, this information – as well as other oral or written technical advises – must be considered as non-binding hints. The user is obliged in each particular case to conduct performance tests, including but not limited to trails of the product, in an inconspicuous area or fabrication of a sample piece.
